Office Action Summary	Application No. 10/688,559	Applicant(s) PIERRAT ET AL.	
	Examiner Paul Dinh	Art Unit 2825	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is rejected because “the original fabrication layer” on line 5 lacks antecedent basis.

Claim 3 is rejected because “the original fabrication layer” on line 5 lacks antecedent basis.

Claim 4 is rejected because “the original fabrication layer” on line 8 lacks antecedent basis.

Claim 5 is rejected because “the original fabrication layer” on line 3 lacks antecedent basis.

Claim 6 is rejected because “the original fabrication layer” on line 4 and “the segment in the fabrication layout” on line 7 lack antecedent basis.

Claim 6 is rejected because it is not clear that “the segment” on lines 8, 9, and 11 refer to “segment of an edge in the original fabrication layer” on line 4 or “segment in the fabrication layout” on line 7

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2825

Claim 1 and similarly recited claims 2-5 and 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by the prior art of record from IDS Rieger et al (USP 6289499):

Executing a routine implementing an inverse proximity effects model for a segment of an Edge in an original fabrication layer (col 1 line 60 to col 2 line 40, summary, col 4 line 51+);
and

Determining a correction for the segment based on a difference between an output from the inverse proximity effects model and an initial position for the segment in the fabrication layout (col 1 line 60 to col 2 line 40, summary, col 4 line 51+).

Allowable Subject Matter

Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 6 would be allowable because the prior art of record does not teach or suggest a method for fabricating a printed features layer with a combination of all the steps as recited in the claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Dinh whose telephone number is 571-272-1890.
